

NEW BUSINESS

A CHANGELS MASTERY PROGRAM

NEW BUSINESS #3. A one year further training for people who want to grow their project ideas into sustainable and inspiring businesses.

We at changels are strong in coaching entrepreneurs and their teams to sustainable and regenerative success. We have been running several leadership trainings and strategic development processes for companies and entrepreneurs in start-up and further development to reach new horizons. We have started the KaosPilots school for responsible entrepreneurs, creative leaders and change makers here in Switzerland, a three year full time education with an international focus. We have initiated the Innovationsdorf Bern as a hub for creative entrepreneurs who are interested for new ways of doing business, working together as a community and tribe of like-minded open and aware human beings.

We have been asked many times, whether we could offer a one year further training for entrepreneurs that is lighter than the three year KaosPilots training and focusing on people who already have a running business or are about to start up. We loved the idea, and based on the best of the changels competencies, experiences and our learnings from the KaosPilot training we started our **first NEW BUSINESS mastery program in 2014, the second in April 2016** with groups of inspired entrepreneurs from various backgrounds and with business ideas from cooking, coffee-roasting, aviation consulting, holistic health centers, photography, affordable solar technology for communities, city guides for a sustainable living, light design to new education offers for young people and co-working retreats at the countryside.

And now we are ready for the next round: the changels NEW BUSINESS #3 mastery program for passionate entrepreneurs with existing and new projects and business dreams.
